Quadrilaterals

Quadrilateral

A quadrilateral has four-sides

Trapezoid

A trapezoid (called a trapezium in the UK) has a pair of opposite sides parallel.

Isosceles Trapezoid

An isosceles trapezoid has left and right sides of equal length that join to the base at equal angles.

Parallelogram

A parallelogram has opposite sides parallel and equal in length.

Rhombus

A rhombus is a four-sided shape where all sides have equal length.

Rectangle

A rectangle is a four-sided shape where every angle is a right angle (90°).

Square

A square has equal sides and every angle is a right angle (90°)

Kite

It has two pairs of sides: each pair is made of two equal-length sides that join up.
